PROFESSIONAL SUMMARY

Ninth-semester Software Engineering student at UPC (top fifth of class, GPA 17.02/20) focused on defensive and infrastructure security. Hands-on experience with SIEM monitoring, log analysis and alert triage through a self-built Wazuh SOC lab, plus real-world access management (Active Directory, Microsoft Entra ID) and incident documentation from an IT internship at the International Potato Center. Comfortable with Linux and the command line, networking fundamentals and Python scripting; familiar with OWASP Top 10, MITRE ATT&CK, PCI DSS and ISO/IEC 27001. Daily Claude user for research, scripting and documentation. Currently completing the Hack The Box SOC Analyst path and eager to grow into AWS and Kubernetes security.

EXPERIENCE

International Potato Center (CIP) | ***Helpdesk and Support Intern*** **Lima, Perú** | March 2026 – September 2026

- Supported the administration of user accounts, permissions and access through Active Directory and Microsoft Entra ID, contributing to user access management and control.
- Provided L1/L2 technical support to internal users, troubleshooting Windows, connectivity, corporate applications, hardware and device configuration.
- Managed and documented incident tickets, recording diagnosis, actions taken, case status and escalation when needed.
- Configured, maintained and prepared corporate devices following IT guidelines.
- Supported IT asset tracking and kept inventory records up to date.
- Identified opportunities to improve and automate support, documentation and incident-handling processes.

PROJECTS

Home SOC Lab with Wazuh — github.com/choliwys/home-soc-wazuh-lab

- Built a defensive SOC lab with Wazuh 4.14 on Ubuntu Server, deploying the Manager, Indexer, Dashboard, Filebeat and a Linux agent to centralize and analyze security events.
- Ran controlled scenarios for File Integrity Monitoring, SSH authentication and privileged activity with sudo, performing initial triage, log analysis, alert investigation and documentation of findings.
- Documented three security events with technical context and MITRE ATT&CK mapping where applicable.
- Developed a Python tool to validate sanitized data and automate the generation of detection summaries and lab metrics.

Integrated Helpdesk & IT Asset Management System — github.com/choliwys/helpdesk-powerplatform

- Designed a Power Apps application to log, track and manage technical support tickets.
- Implemented Power Automate workflows to notify new incidents and status changes.
- Built a Power BI dashboard connected to SharePoint Lists to visualize KPIs, incident categories, ticket status and potential bottlenecks.

IT Operations Data Insights Dashboard — github.com/choliwys/it-operations-data-insights

- Developed an analysis workflow over 800 simulated IT support tickets using Python, SQL and Power BI.
- Built a Python ETL process to generate metrics on SLA, resolution times, escalations, reopenings and satisfaction.
- Wrote SQL queries and visualizations to identify operational trends, priorities and SLA gaps.

SKILLS

- **Security operations:** Wazuh (SIEM), security monitoring, log analysis, alert triage, incident investigation and documentation, File Integrity Monitoring, MITRE ATT&CK.
- **Security fundamentals:** vulnerability management, hardening, access control and least privilege, authentication, OWASP Top 10; familiar with PCI DSS, ISO/IEC 27001 and NIST CSF.
- **Linux & systems:** Linux (Ubuntu Server), command line, SSH, UFW, Windows, Active Directory, Microsoft Entra ID, Microsoft 365.
- **Networking:** TCP/IP, OSI, DNS, DHCP, HTTP/HTTPS, SSH, VPN, subnetting, VLAN and firewall fundamentals.
- **Scripting & tools:** Python, SQL, basic scripting, Git/GitHub.
- **AI tools:** Claude (daily use for research, scripting and documentation; custom skills built for research workflows).
- **Data & reporting:** Advanced Excel, Power BI, KPIs, dashboards.

EDUCATION

Universidad Peruana de Ciencias Aplicadas (UPC) — B.S. in Software Engineering, 9th semester Lima, Peru · March 2022 – Present · Expected graduation: July 2027

- Top fifth of class by cumulative weighted average (GPA 17.02/20).
- Relevant coursework: Information Security, Data Networks and Communications, Cybersecurity and Digital Government, Cyberattacks: Methods and Tools, Database Design, Software Process Quality, Software Project Management.
